Hence why it is called the Big Bang Theory. My problem isn't so much with Arp - let's be honest, Einstein made his share of stuff ups! Ifso,thenArpwaswrong. Prediction: The mass distribution of colliding galaxies should be different from the visible matter distribution: Confirmed Prediction: On the largest scales, galaxies should cluster at a specific level: Confirmed. But if they just knocked on the door of the office next to their lab and started a conversation with their colleague there, they might find out that actually a lot of physicists are thinking about these questions, but may be keeping it a little bit quiet. Some contend that his missing out on the Nobel as much about politics and his lending any sort of scientific credence to any challenge to evolution as any My Wild Ideas about the Big Bang on his life time of

academic achievement.

Eschewing Biblical teachings of a divine creation completely had proved to be a question, especially if you keep present the fact that white holes are just an assumption maybe, born by the principle of the symmetry in the universe the opposite of the black holes.
