The pre-reflective world is a world in which the self is absent Mind, Self and Society The self, then, has reference, not only to others, but to social projects and goals, and it is by means of the socialization process that is, the internalization of the generalized other through language, play, and the game that the individual is brought to "assume the attitudes of those in the group who are involved with him

in his social activities" The Philosophy of the Act The initial temporal structure of human time-consciousness lies in the separation of present and future by the emergent event. TheRomanticsdidnot"postulate"theself;theyassertedit"assomethingwh The only synthetic apriori knowledge we can have is of how our minds organise the data of the senses; that organising framework is space and time, which for Kant have no mind-independent existence, but nonetheless operate uniformly in all humans. Understanding scientific objectivity is therefore central to understanding the nature of science and the role it plays in society. Indeed, a purely functionalist view may not account for the fact that many social norms are harmful or inefficient e. SocialSpaceandSymbolicPower.American Philosophical Quarterly. I am grateful to Denis Paul, an adaptation of whose translation I quote, for bringing this passage to my attention.
