Inventor of the manometer Siegel modular forms I liked his devotion to pacifism and his distress that his theory of relativity lead to the development of the atomic bomb. He is widely regarded as one of the greatest experimentalists who ever lived. Jan 16, Brittney rated it liked it. I also enjoyed learning that he never lost his curiosity about the world and had the extreme patience to allow himself to work on a theory for more than thirty years. Questions that need answers My Posts. Ultimately, he saw himself as a tool to be used to further mankind-to make the world a better place to live in. Email Address.
